SECTION 4 First-aid measures

Aquadraft Extreme**Description of first aid measures**

Eye Contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Skin Contact	Wash exposed areas with soap and water. If itching and redness persist, seek medical attention.
Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Ingestion	Contact physician or poison control center. If victim is conscious and able to swallow, quickly give milk or water to dilute. Do not give sodium bicarbonate, vinegar, or fruit juice. Never give anything by mouth if victim is unconscious or having convulsions. Induce vomiting only upon advice by physician.

SECTION 5 Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Caron Dioxide.
Unsuitable extinguishing media	Do not use water jets as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Firefighting equipment/instructions	Move containers from fire area if you can do so without risk.
Specific Methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.
Fire Incompatibility	Avoid contamination with oxidizing agents i.e. nitrates, oxidizing acids, chlorine bleaches, pool chlorine etc. as ignition may result

SECTION 6 Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material; if possible without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand, or earth and place into containers. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (cloth, fleece). Clean surface thoroughly to remove residual contamination.
Environmental Precautions	Avoid discharge into drains, water courses or onto the ground.

SECTION 7 Handling and storage

Precautions for safe handling	Avoid contact with eyes. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene.
Conditions for safe storage, including any incompatibilities	Store in a tightly closed container. Keep in a cool, dry place. Store away from any strong oxidizer, strong bases, chlorates, or nitrates.

Note: Depending on other risk factors, compatibility assessment based on the table above may not be relevant to storage situations, particularly where large volumes of dangerous goods are stored and handled. Reference should be made to the Safety Data Sheets for each substance or article and risks assessed accordingly.

SECTION 8 Exposure controls / personal protection**Control parameters**

Occupational Exposure Limits (OEL)	None known
Biological Limit Values	None known
Appropriate Engineering Controls	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use proper enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eye wash and safety shower in work area.

Individual Protection Measures / PPE

Personal protection	   
Eye and face protection	This chemical requires the use of a chemical protective goggle that meet ANSI/ISEA Standard when handling this chemical.
Hand protection	This chemical requires the use of a chemical resistant glove that meet ANSI/ISEA Standard and is necessary when handling this chemical
Respiratory Protection	The use of a NIOSH approved respiratory protection may be needed if working in a poor ventilated area.
Work / Hygienic Practices	Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling.
